HYDROMASSAGE 440 G3

Personalized, Full-Body Heated Massage for Wellness and Muscle Recovery

Designed to impress, the HydroMassage 440 G3 embodies quality and functionality, meeting the needs of diverse industries seeking wellness and recovery technology and solutions.

Full Body Heated Massage

Relieve minor soreness and stress with a fully customizable massage for muscle recovery.

On-Demand Relaxation and Stress Relief

Created with convenience and simplicity in mind, HydroMassage provides a relaxing massage in 15 minutes or less while fully clothed. No attendant required!

Easy to use

State-of-the-art touchscreen interface with enhanced, simplified controls that offer one-touch selections for targeted massage areas.

Customize Your Massage

Smooth Wave Traveling Massage:

Jets move up and down the body with a wave of heated water, giving the user a relaxing massage.

Targeted Combinations:

From the lower calf all the way through your upper back and neck area, you control where to target the massage.

Pressure Control: Provide specific areas with the pressure and intensity of your choice for maximum relief and relaxation.

Speed Adjustment: Adjust the speed of the heated water jets for a personalized massage experience.

CryoLounge+[®]

Advanced Recovery Chair for Targeted Cold

A convenient cold recovery experience to target muscle soreness and minor aches and pains. The CryoLounge+ combines cold and heat treatments to deliver a comfortable recovery, ideal for post workout.

Targeted Cold Without Discomfort

CryoLounge+ offers comfortable, targeted temperature recovery that allows users to customize their treatment through six thermal pads. Users select specific areas to apply cold (25° to 30°F, -3.9° to -1.1°C) while heat (95° to 115°F, 35° to 46.1°C) elsewhere on the body reduces the discomfort often associated with targeted cold recovery.

Powerful Post-Workout Recovery

Users can easily unwind with a combination of treatments that promotes a healthy workout recovery. CryoLounge+ chairs offer users a combination of targeted cold, heat and compression to maximize its ability to relax and recover specific muscle groups (lower back, hamstrings, etc.).

Convenient & Accessible Treatments

Unlike traditional ice baths and other methods, users remain fully clothed during the treatment, making it easy to incorporate into regular routines. With its innovative design, CryoLounge+ chairs are the best way to offer cold recovery without staff required.

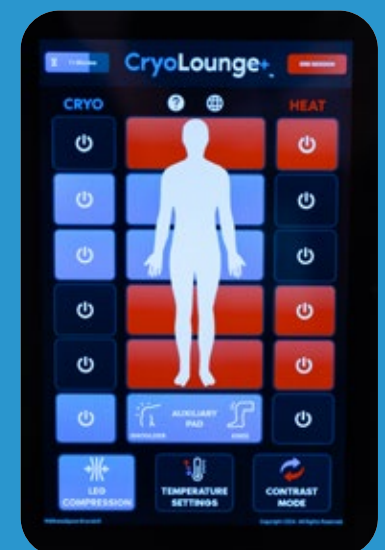

Targeted Features

Six Treatment Zones: Target key muscle groups with cold 25° to 30°F (-3.9° to -1.1°C) or heat 95° to 115°F (35° to 46.1°C).

Compression: Leg Compression feature offers a lower leg and calf massage.

Auxiliary Zone: Auxiliary Pad included for hard-to-reach areas such as shoulders and knees.

Contrast: Contrast mode allows for switching quickly between cold and heat areas in each zone.

Relaxation Pod for a Mental Wellness Break

Feel more calm, relaxed, and focused with the RelaxSpace Wellness Pod. Designed to reduce stress for relaxation and mindfulness.

RelaxSpace Wellness Pod Features

Travel & Nature Videos (with Soundscapes)

Escape with the soothing sounds of nature or mesmerizing sights of cities across the world.

Scent Infusion

From fresh pine to tropical coconut, users have the option of accompanying their experience with scent infusions specifically targeted to reduce stress and enhance relaxation.

Meditation & Breathing Exercises

Users can take a break and reset their minds with calming meditation and breathing videos.

Heart-Rate Monitoring

Track your state of relaxation during each session to be more mindful of stress levels.

Healthy Living & Self-Improvement Tips

Learn more about how to fuel your body with tips on proper nutrition, benefits of exercise, and healthy ways to become more physically active.

Heated Lounge Seat

Users can soothe sore muscles or an achy back during any session with built-in heated seats.

Immersive Screen

All wellness video content is displayed overhead on a large monitor, providing users with an immersive experience.

Intuitive Touchscreen

Users select from a large menu of wellness video content including nature and travel scenes, meditation practices, or mindfulness. Measure heart rate, choose scent, adjust seat temperature and more.

Modern, Futuristic Product Design

RelaxSpace Wellness Pods are designed to catch the eye and provoke member curiosity, generating ongoing awareness.

Relax with nature videos

Breathe with guided breathing

Reset with meditation

Grow with personal growth resources

Focus with mindfulness

Thrive with healthy lifestyle tips

Explore unique cities of the world

Wellness Spaces for Your Business

Enhance your facility with dedicated wellness spaces designed to support mental and physical well-being, drive revenue and deliver premium experiences for your clients.

Adding a wellness space to your facility not only benefits your clients but also boosts your business. Here's how:

- Improved member satisfaction through recovery and stress relief
- Increased revenue opportunities with premium wellness services
- Enhanced client retention through holistic fitness and well-being solutions

Industry Leaders in Wellness

WellnessSpace Brands offers an industry-leading suite of experiential wellness products, including HydroMassage Beds and Lounges, CryoLounge+ Chairs, and RelaxSpace Wellness Pods.

Each of our innovative product lines has a shared vision: to provide people around the world with access to convenient, technology-based solutions for mind and body wellness. Previously known as HydroMassage, WellnessSpace Brands has a 35+ year history partnering with global leaders in the health and wellness markets.

Manufacturing and Quality Control

To uphold our high standards of product quality, all WellnessSpace Brands products are manufactured in the USA at our 55,000 sq. ft. (5,110 m²) headquarters based in Tampa Bay, Florida.

Throughout the production process, each unit must successfully pass through multiple levels of inspections, an automated 24-hour testing process, and an extensive 268-point quality control checklist. The proof is in the numbers. Our durable frame-and-tank HydroMassage design is life tested with a 300lb (136kg) test dummy for more than one million massage cycles—simulating more than 50+ years of usage. Additionally, our proprietary massage manifold is life tested for the equivalent of more than 20 years of usage.

Innovation and User Experience

Wellness Focused, Innovation Driven

For more than 35 years, we have designed, engineered and manufactured more than 20 generations of innovative WellnessSpace Brands products. Our focus will always be on the wellness and satisfaction of our customers.
