

A Fusion of Infrared Heat and Red Light

RedZone brings the power of soothing infrared heat and rejuvenating red light together in a private, spa-like experience. Two technologies. One space. Zero Compromise.

Modern Take on Traditional Saunas

RedZone introduces a bold, contemporary design built for today's wellness spaces. Its clean lines, sleek composite finish, and striking form factor create a statement piece for any spa, gym, or recovery center.

Two Powerful Technologies in One

RedZone unlocks the rejuvenating benefits of both infrared sauna and optional red light – all in a single, time-efficient session.

Engineered for Durability

Purpose-built for high-traffic environments, RedZone's commercial-grade composite interior resists sweat, moisture, and odor – wiping clean in seconds. Year after year, it maintains the same fresh, high-quality appearance with minimal maintenance.

Key Features

Dual-Spectrum Infrared: Far infrared (FIR) panels and near-infrared (NIR) quartz heaters create a consistent, balanced heating environment (100° F-130° F, 38° C-54° C).

Full-Coverage Red Light: Six light panels target key areas, each delivering a blend of 600-650nm and 800-850nm wavelengths. Eyewear protection is required.

Commercial-Grade Composite Interior: Durable, non-porous interior resistant to moisture, odor, and wear, while built-in drainage channels manage condensation for a cleaner experience.

Engineered to Magnify Heat: RedZone's forced-air circulation system creates a noticeably warmer experience. A constant supply of heated air is circulated inside the sauna cabin towards the user for maximum heat impact.

Relaxation-Ready Environment: Contoured seating provides spa-like comfort unlike conventional wooden planks. Additionally, a frosted glass door provides privacy for the user, and Bluetooth-enabled speakers offer calming music for a relaxing and immersive experience.

Enhanced Air Quality and Comfort: HEPA and charcoal air filters ensure clean, odor-free air while a built-in fan assists with airflow and drying.

Integrated Safety and Access Control: A seat-based sensor produces audible alerts to notify users when sessions end and or if the door is left ajar. RedZone Sauna is compatible with external timers for usage tracking and access management.

Technical Specifications

Session Length: 10-15 minutes

Dimensions: L 44" x W 62" x H 84" (L 118 cm x W 157 cm x H 213 cm)

Weight: 775 lbs (351 kg)

Electrical Requirements: 60 Hz: 208-240V / 50 hz: 230V (3 phase options available)

Tested and approved: UL/CB/CE safety standards

Warranty

3-year warranty for structure

2-year warranty on replacement parts

90 days of labor coverage

International warranties may vary.

Made in the USA
